## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I along with Species drawn to recording material in the reply filed on 05/12/2006 is acknowledged.

### ***Claim Objections***

2. Claim 5 is objected to because of the following informalities: The claim recites the limitation "the binder" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Sumioka et al. (US 2003/0072923 A1).

Sumioka discloses an ink jet recording material comprising a support and an ink receptive layer on the support (abstract). The ink receptive layer comprises inorganic particles such as silica, alumina and alumina hydrate [0017], a binder such as polyvinyl alcohol [0023] and a compound of formula II [0033]. The compound of formula II is
